A simple way to get home safe

## Messaging Time

Be able to communicate with other walk buddies in real time

## Sending Location

Once messages are sent out you can send your location to meet up.

# Messaging Buddies

Messaging your newfound walking friends is as easy as 1, 2 , and 3.

01

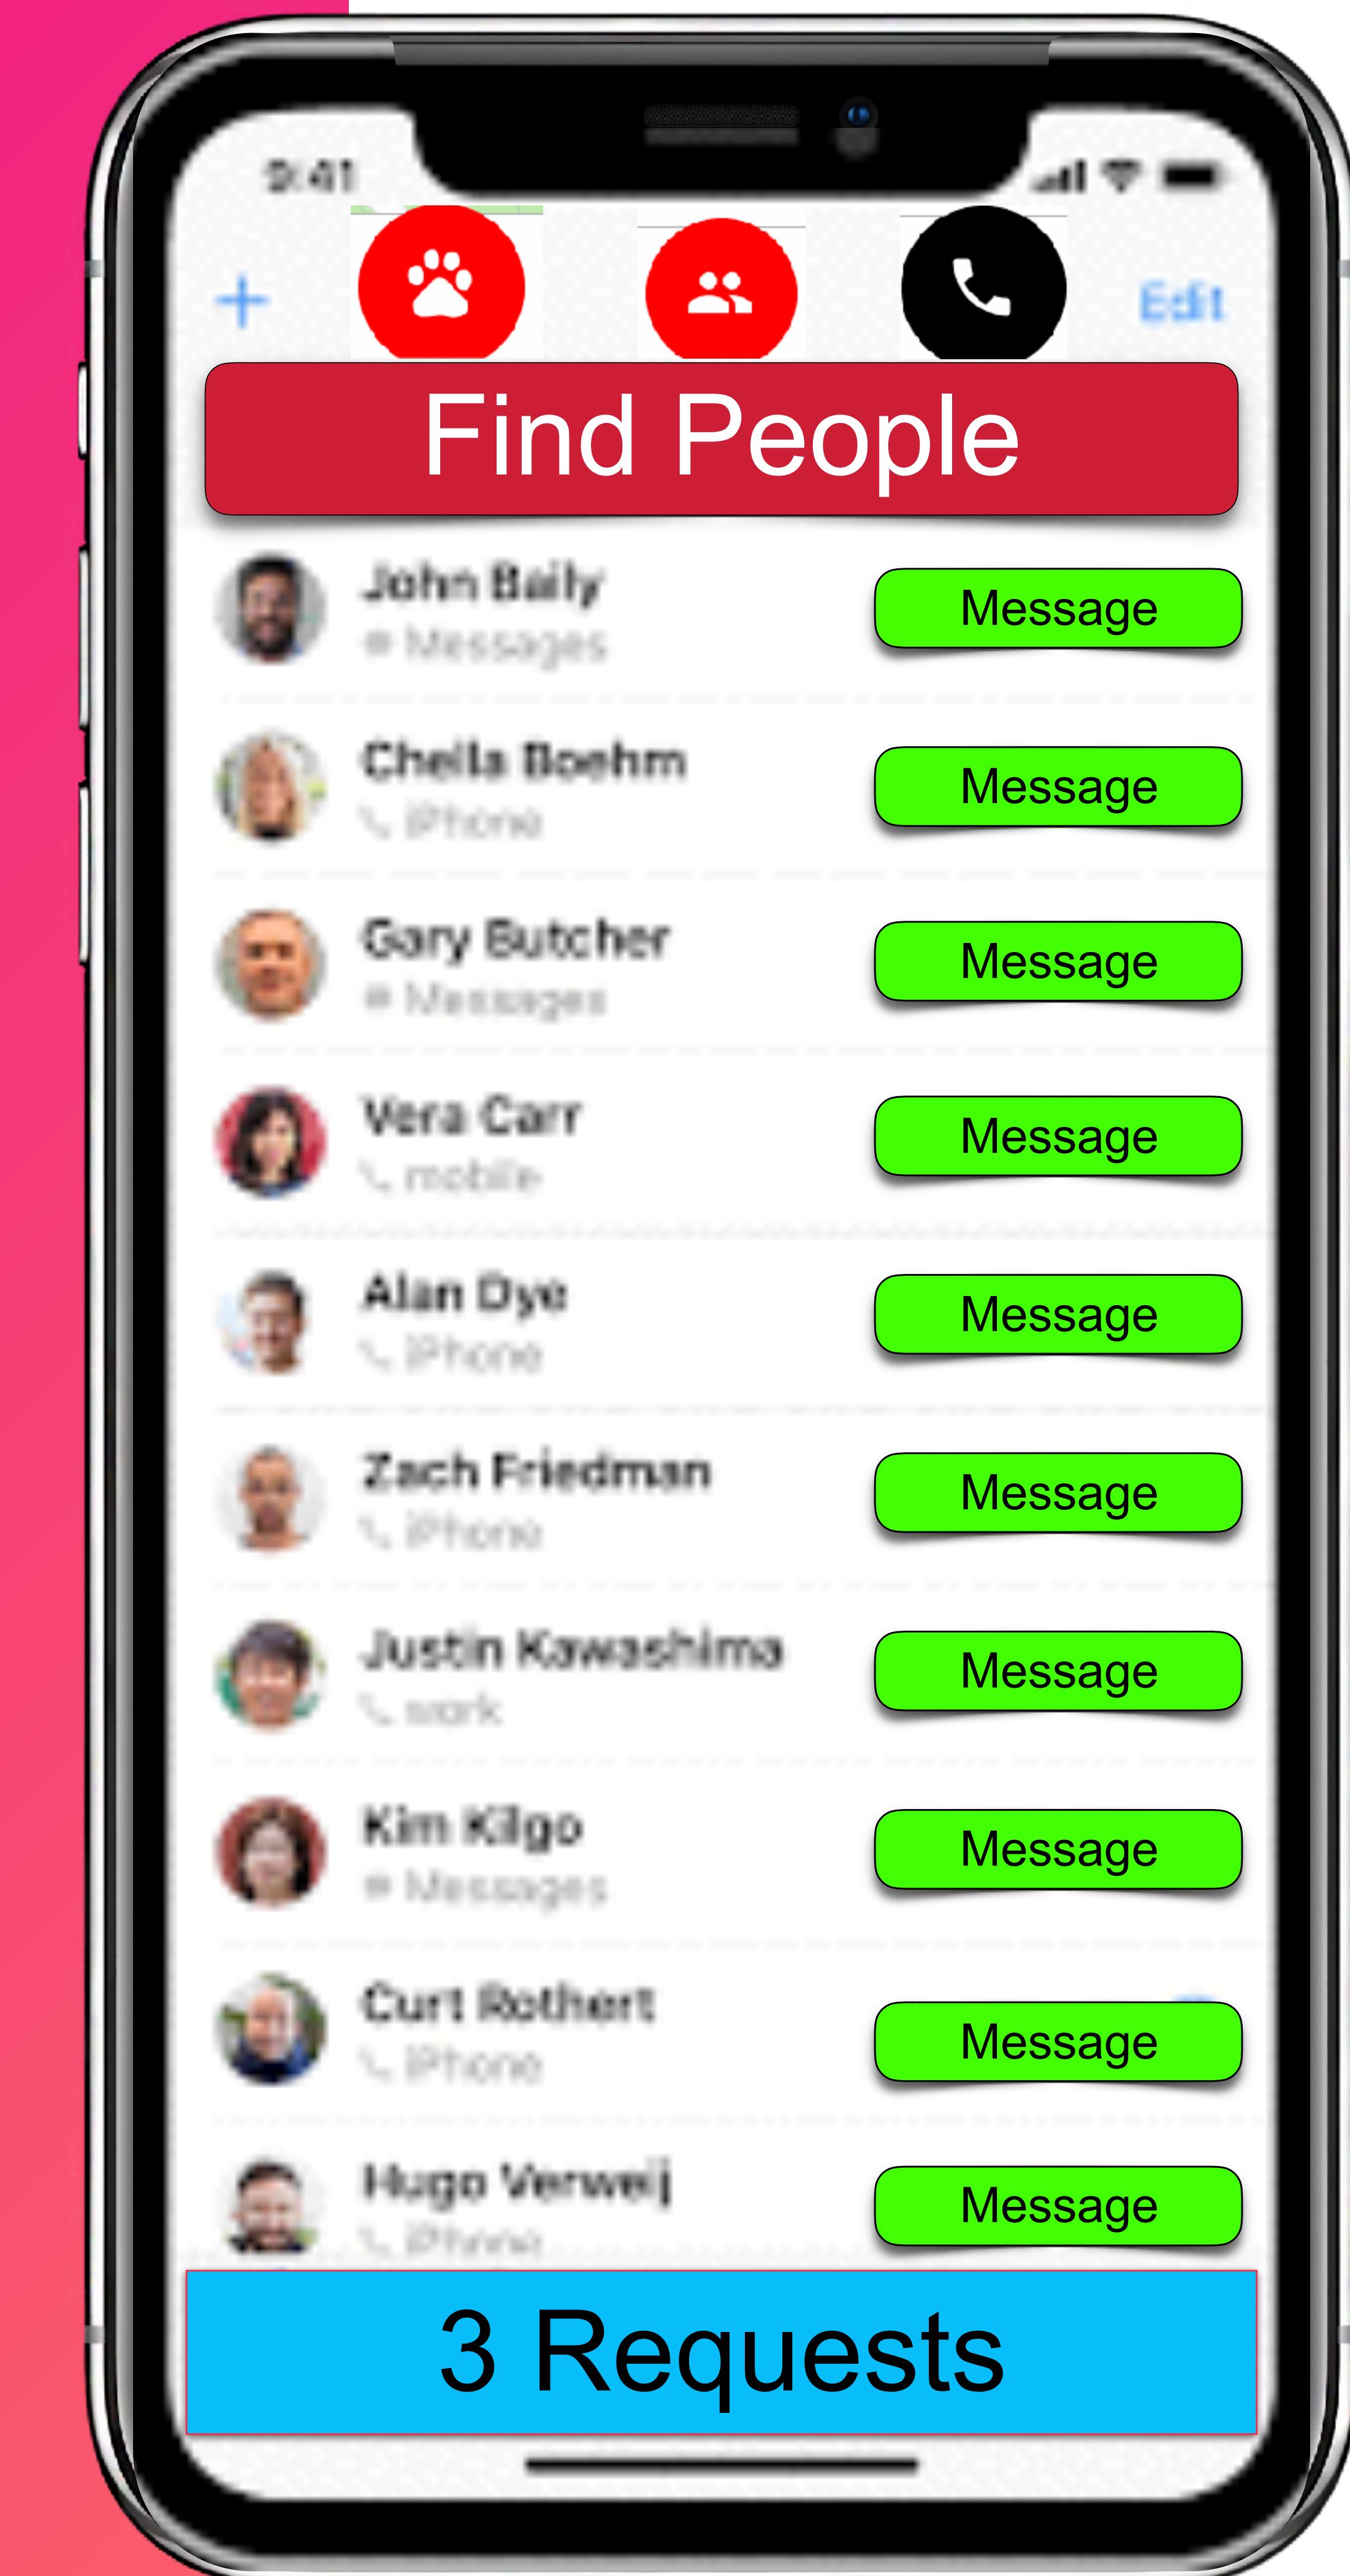

Put out your location and a list of people requesting will pop up

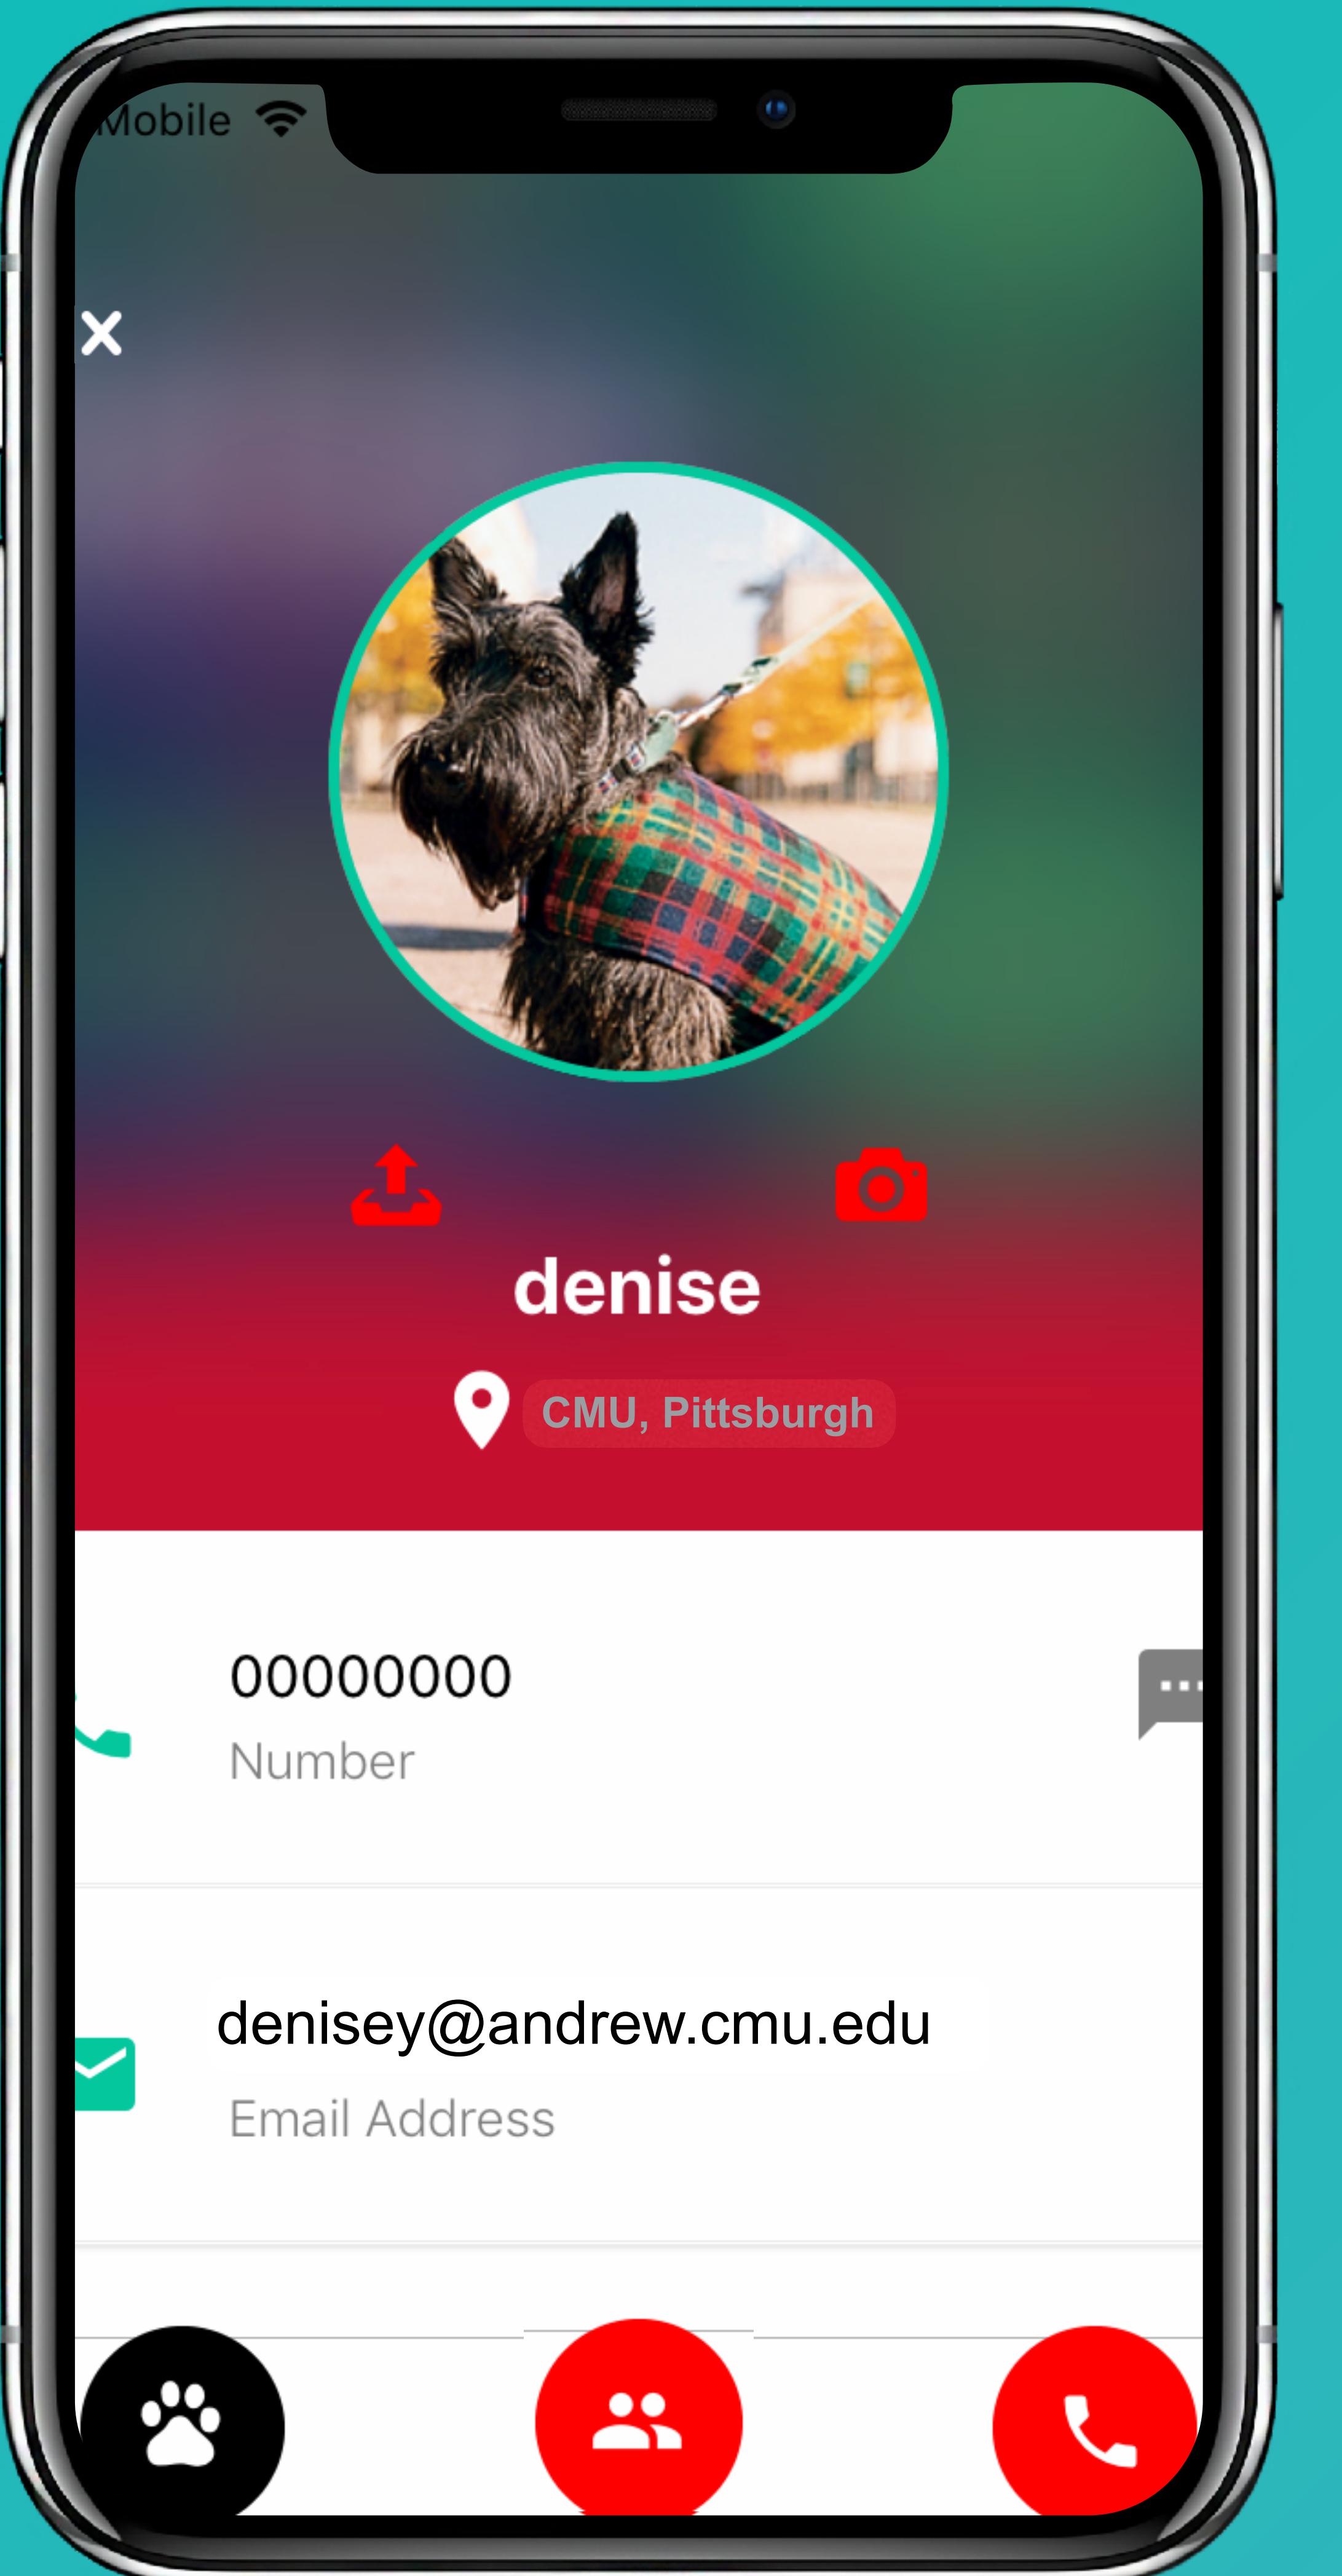

02

Choose your friend from your list

03

If they accept the request then start messaging

# Profile Screen

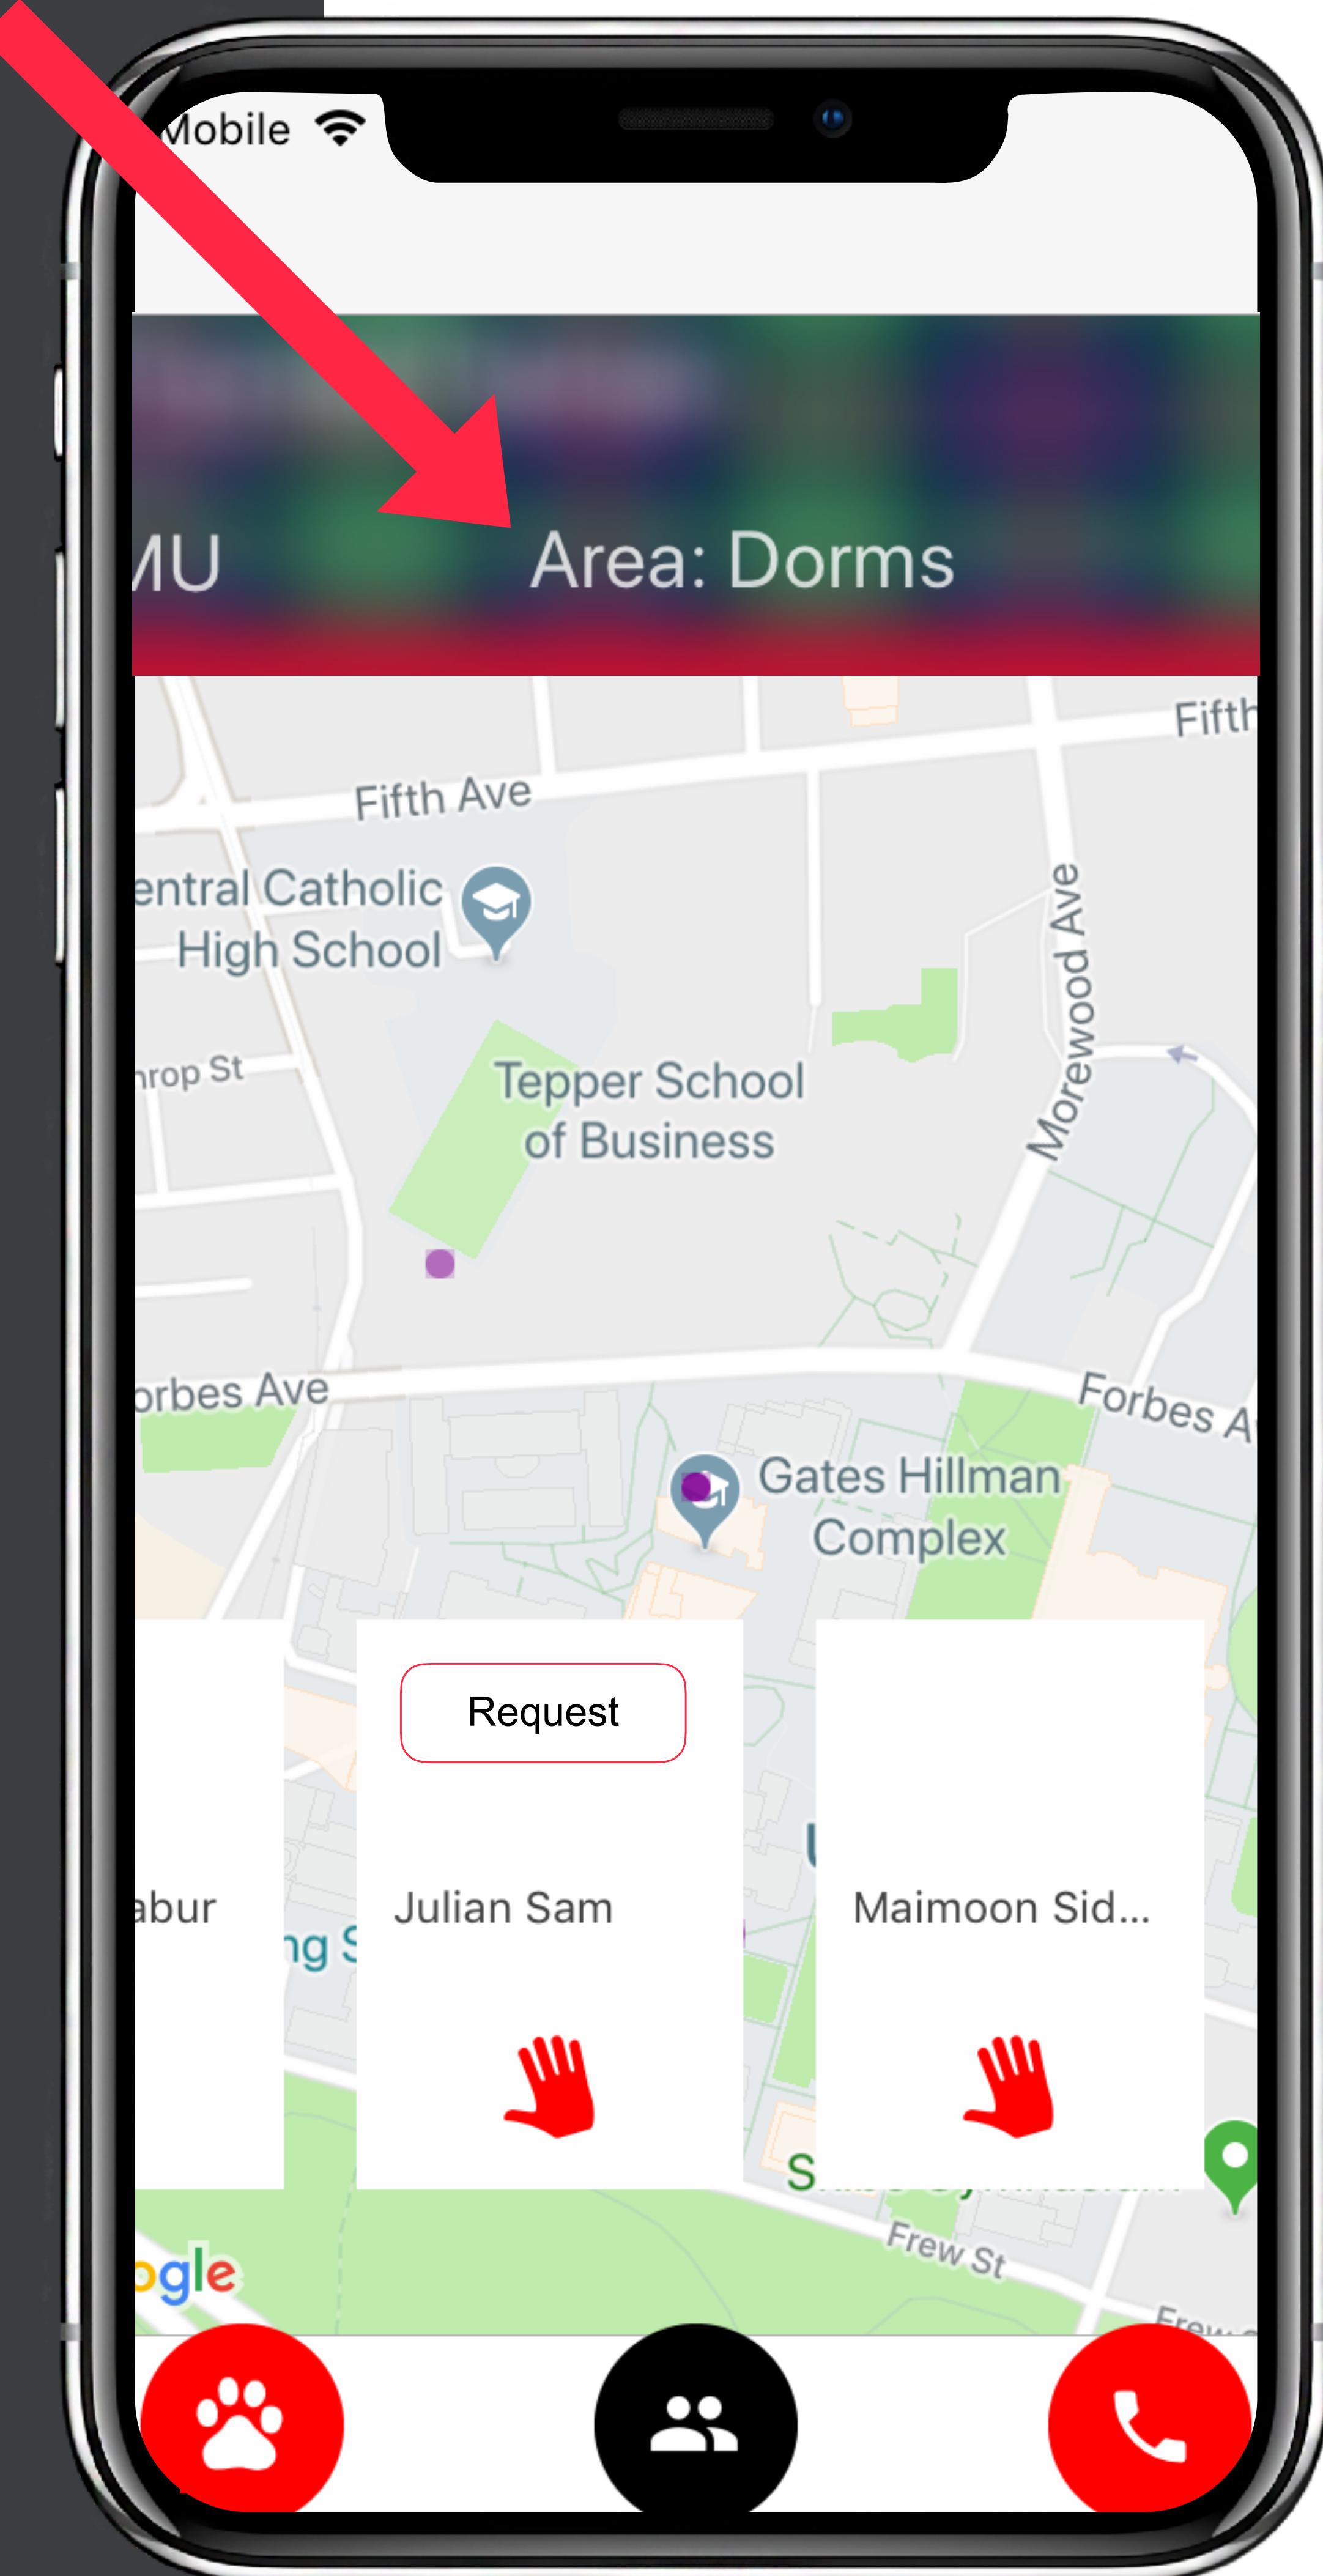

This screen is where you put your information for other walk buddies to connect with.

# Location

Your location is sent in the system then your name will come up on the request list

01

Once you request for walking buddies then your location is sent out

02

After your location is sent out a screen shows how many walk friends are in your location

03

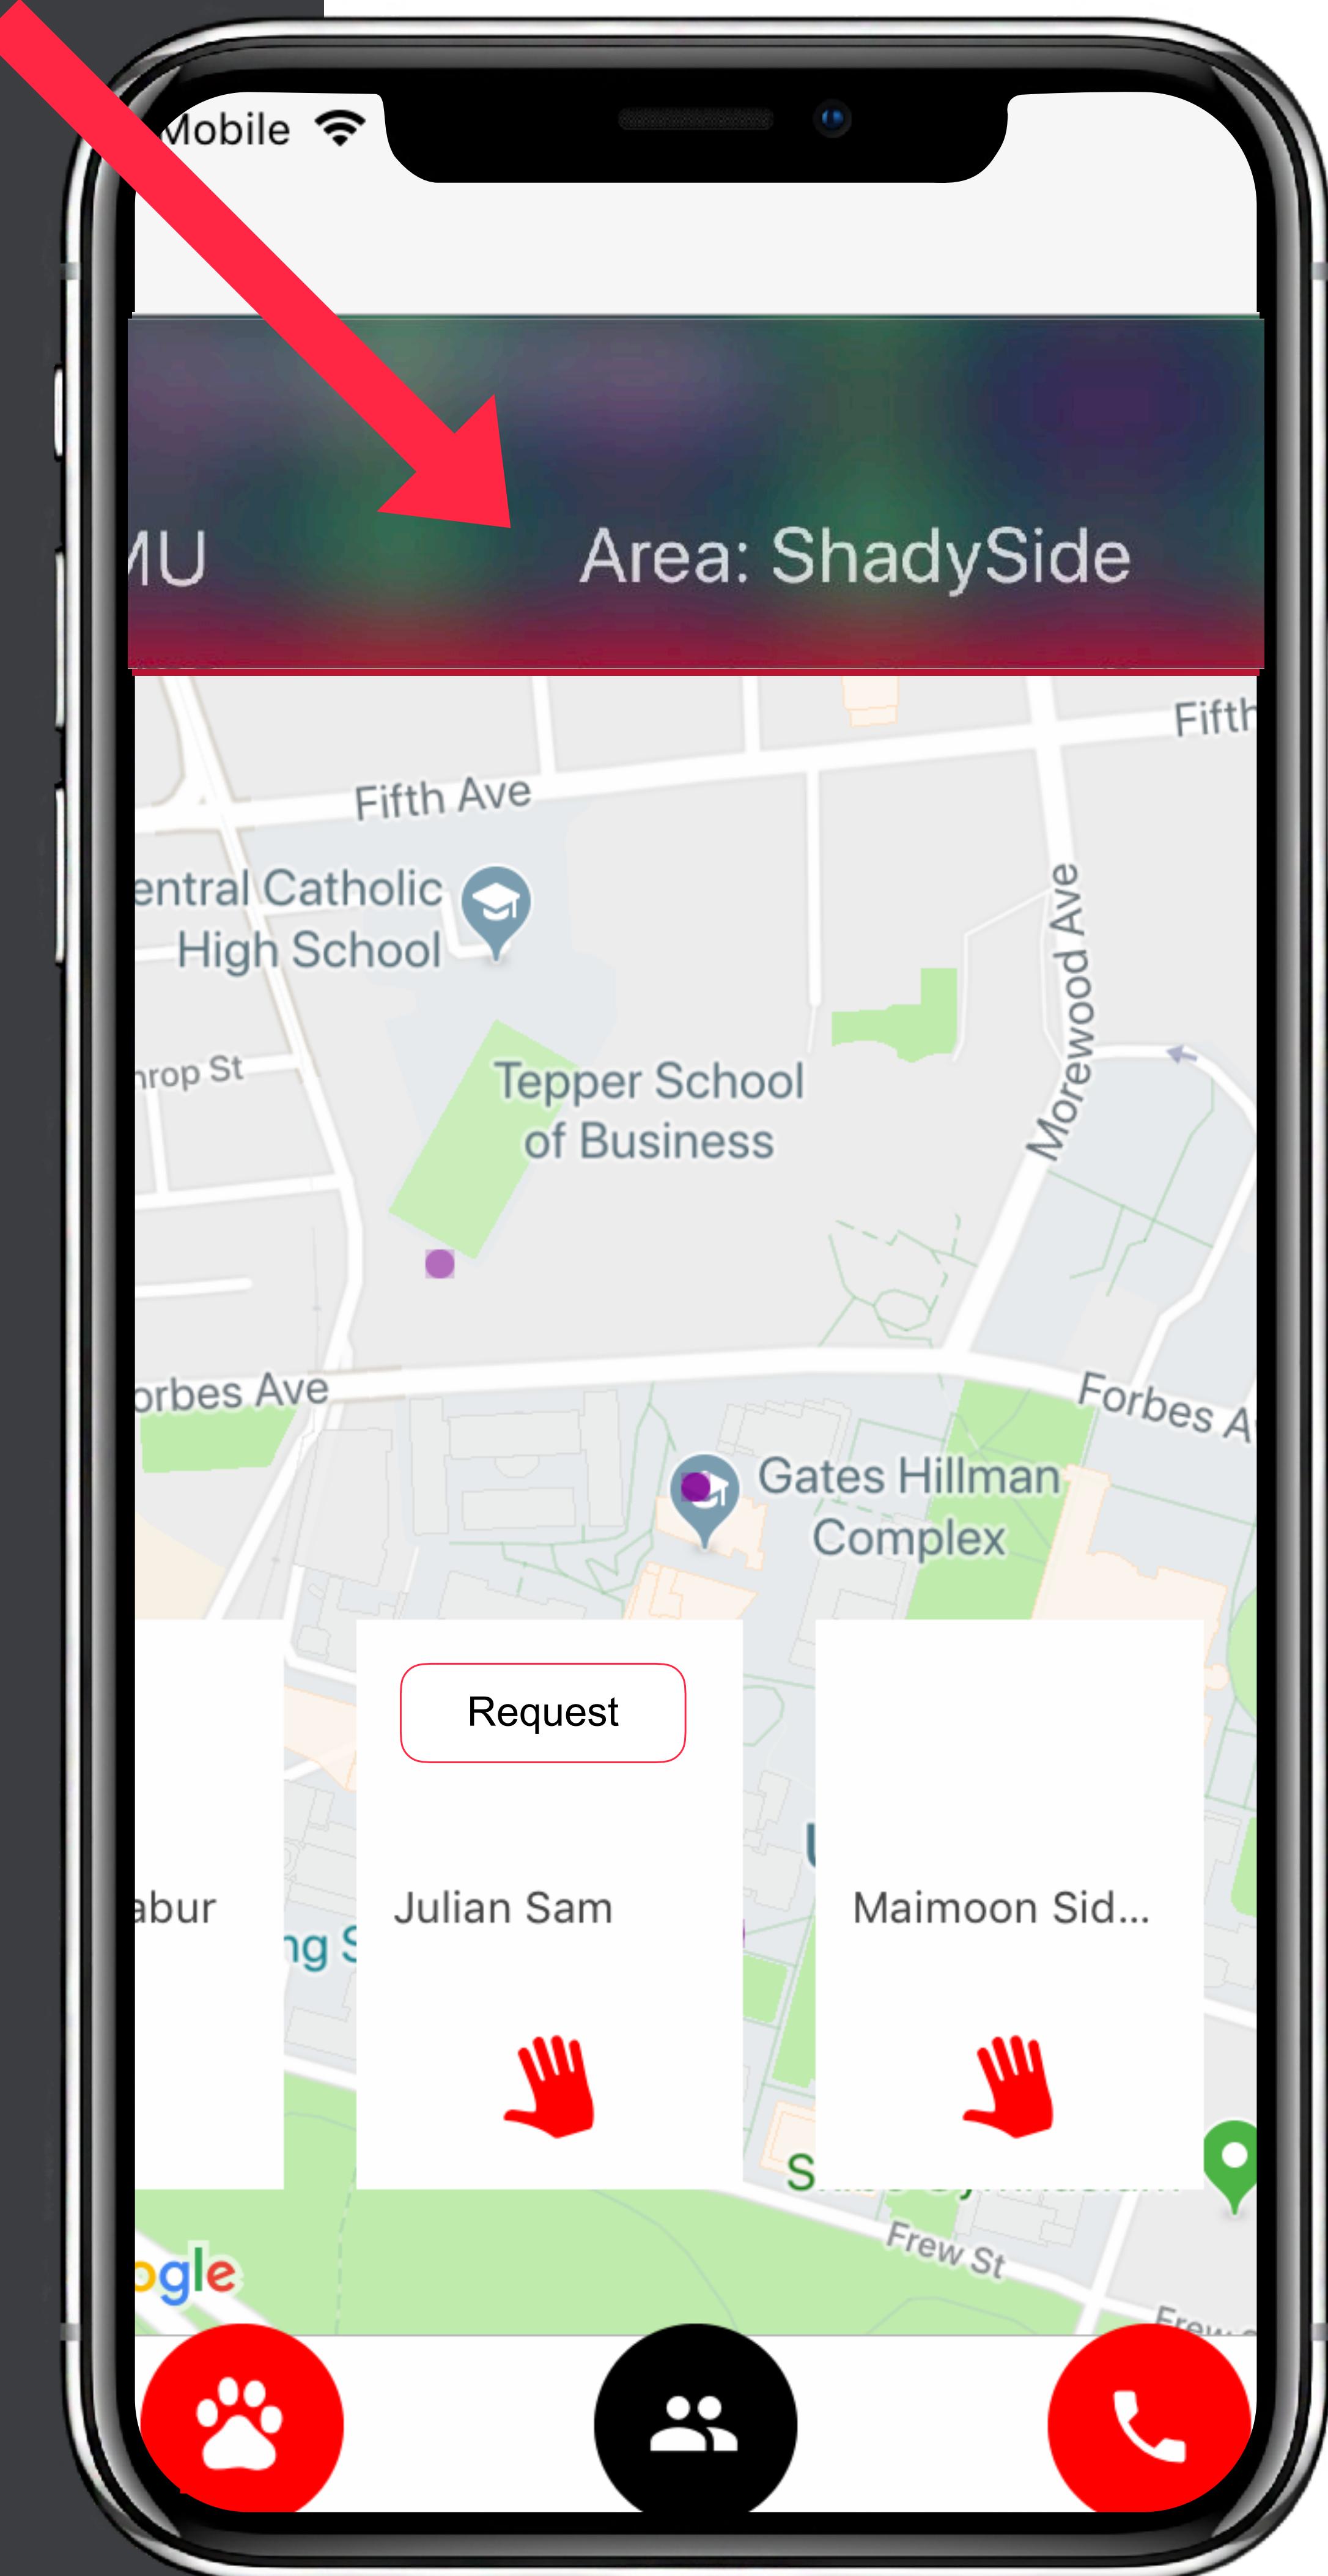

The locations of other walk friends are also shown on the screen

# Location

Your location is sent in the system then your name will come up on the request list

01

Once you request for walking buddies then your location is sent out

02

After your location is sent out a screen shows how many walk friends are in your location

03

The locations of other walk friends are also shown on the screen

# Area

The walk buddies in the surrounding vicinity  
are filtered under areas

01

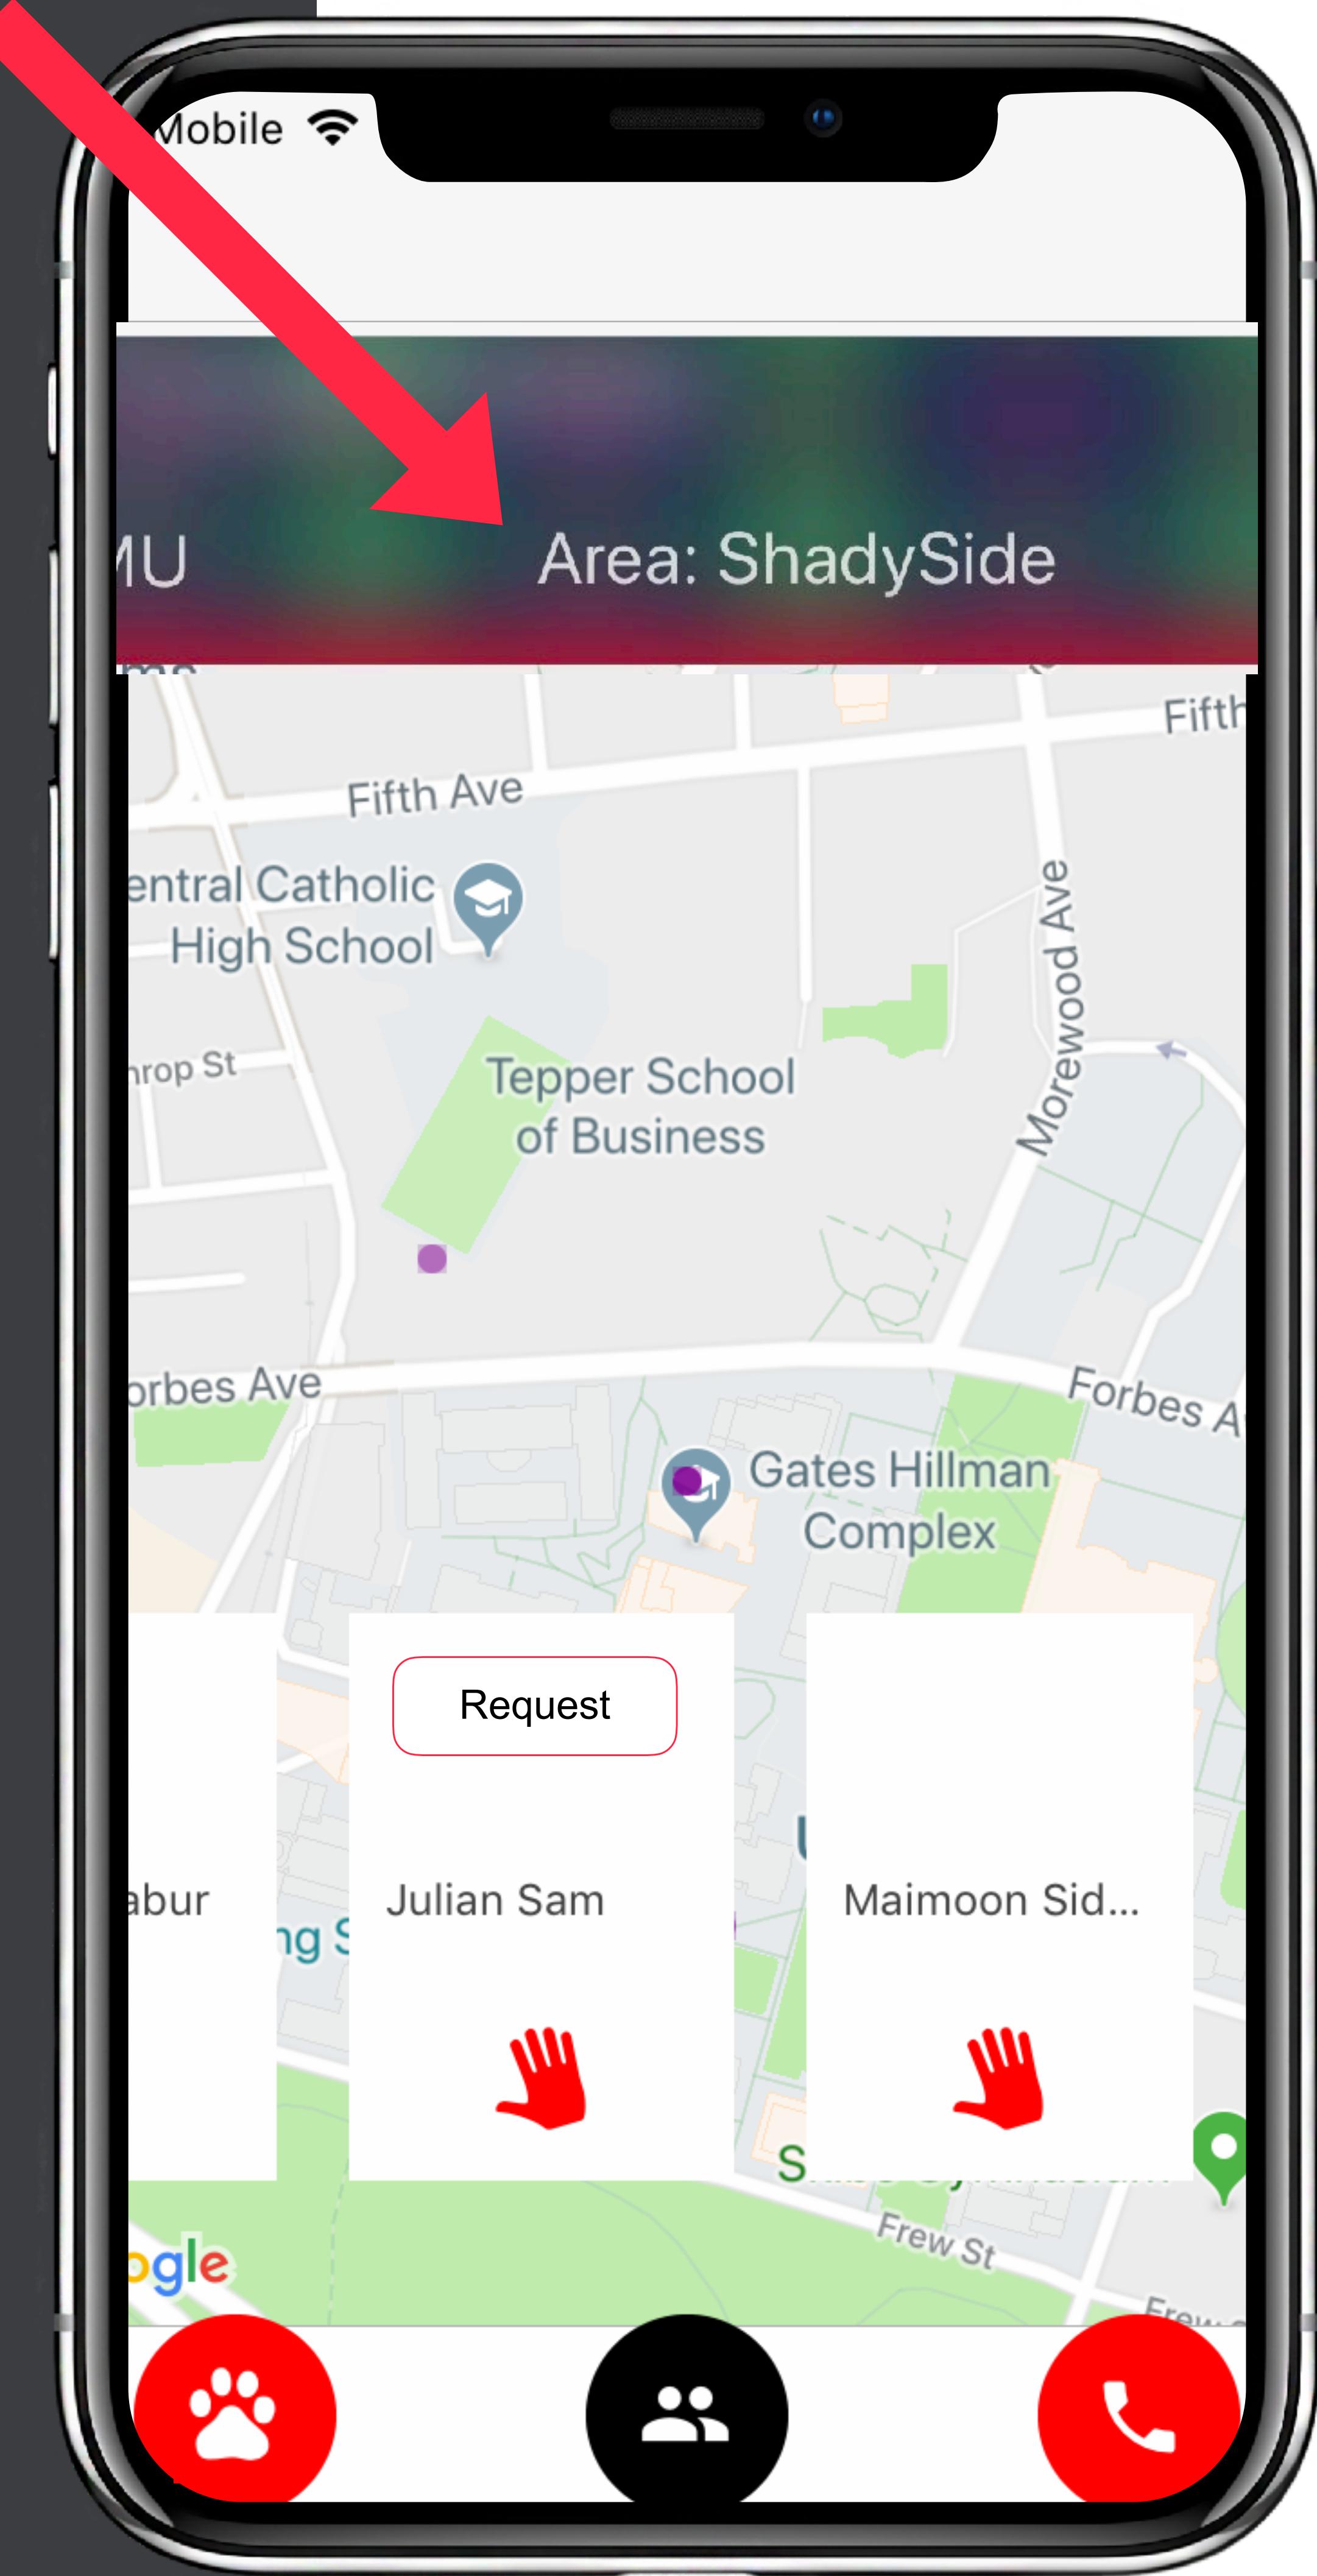

The area groups walk  
buddies together

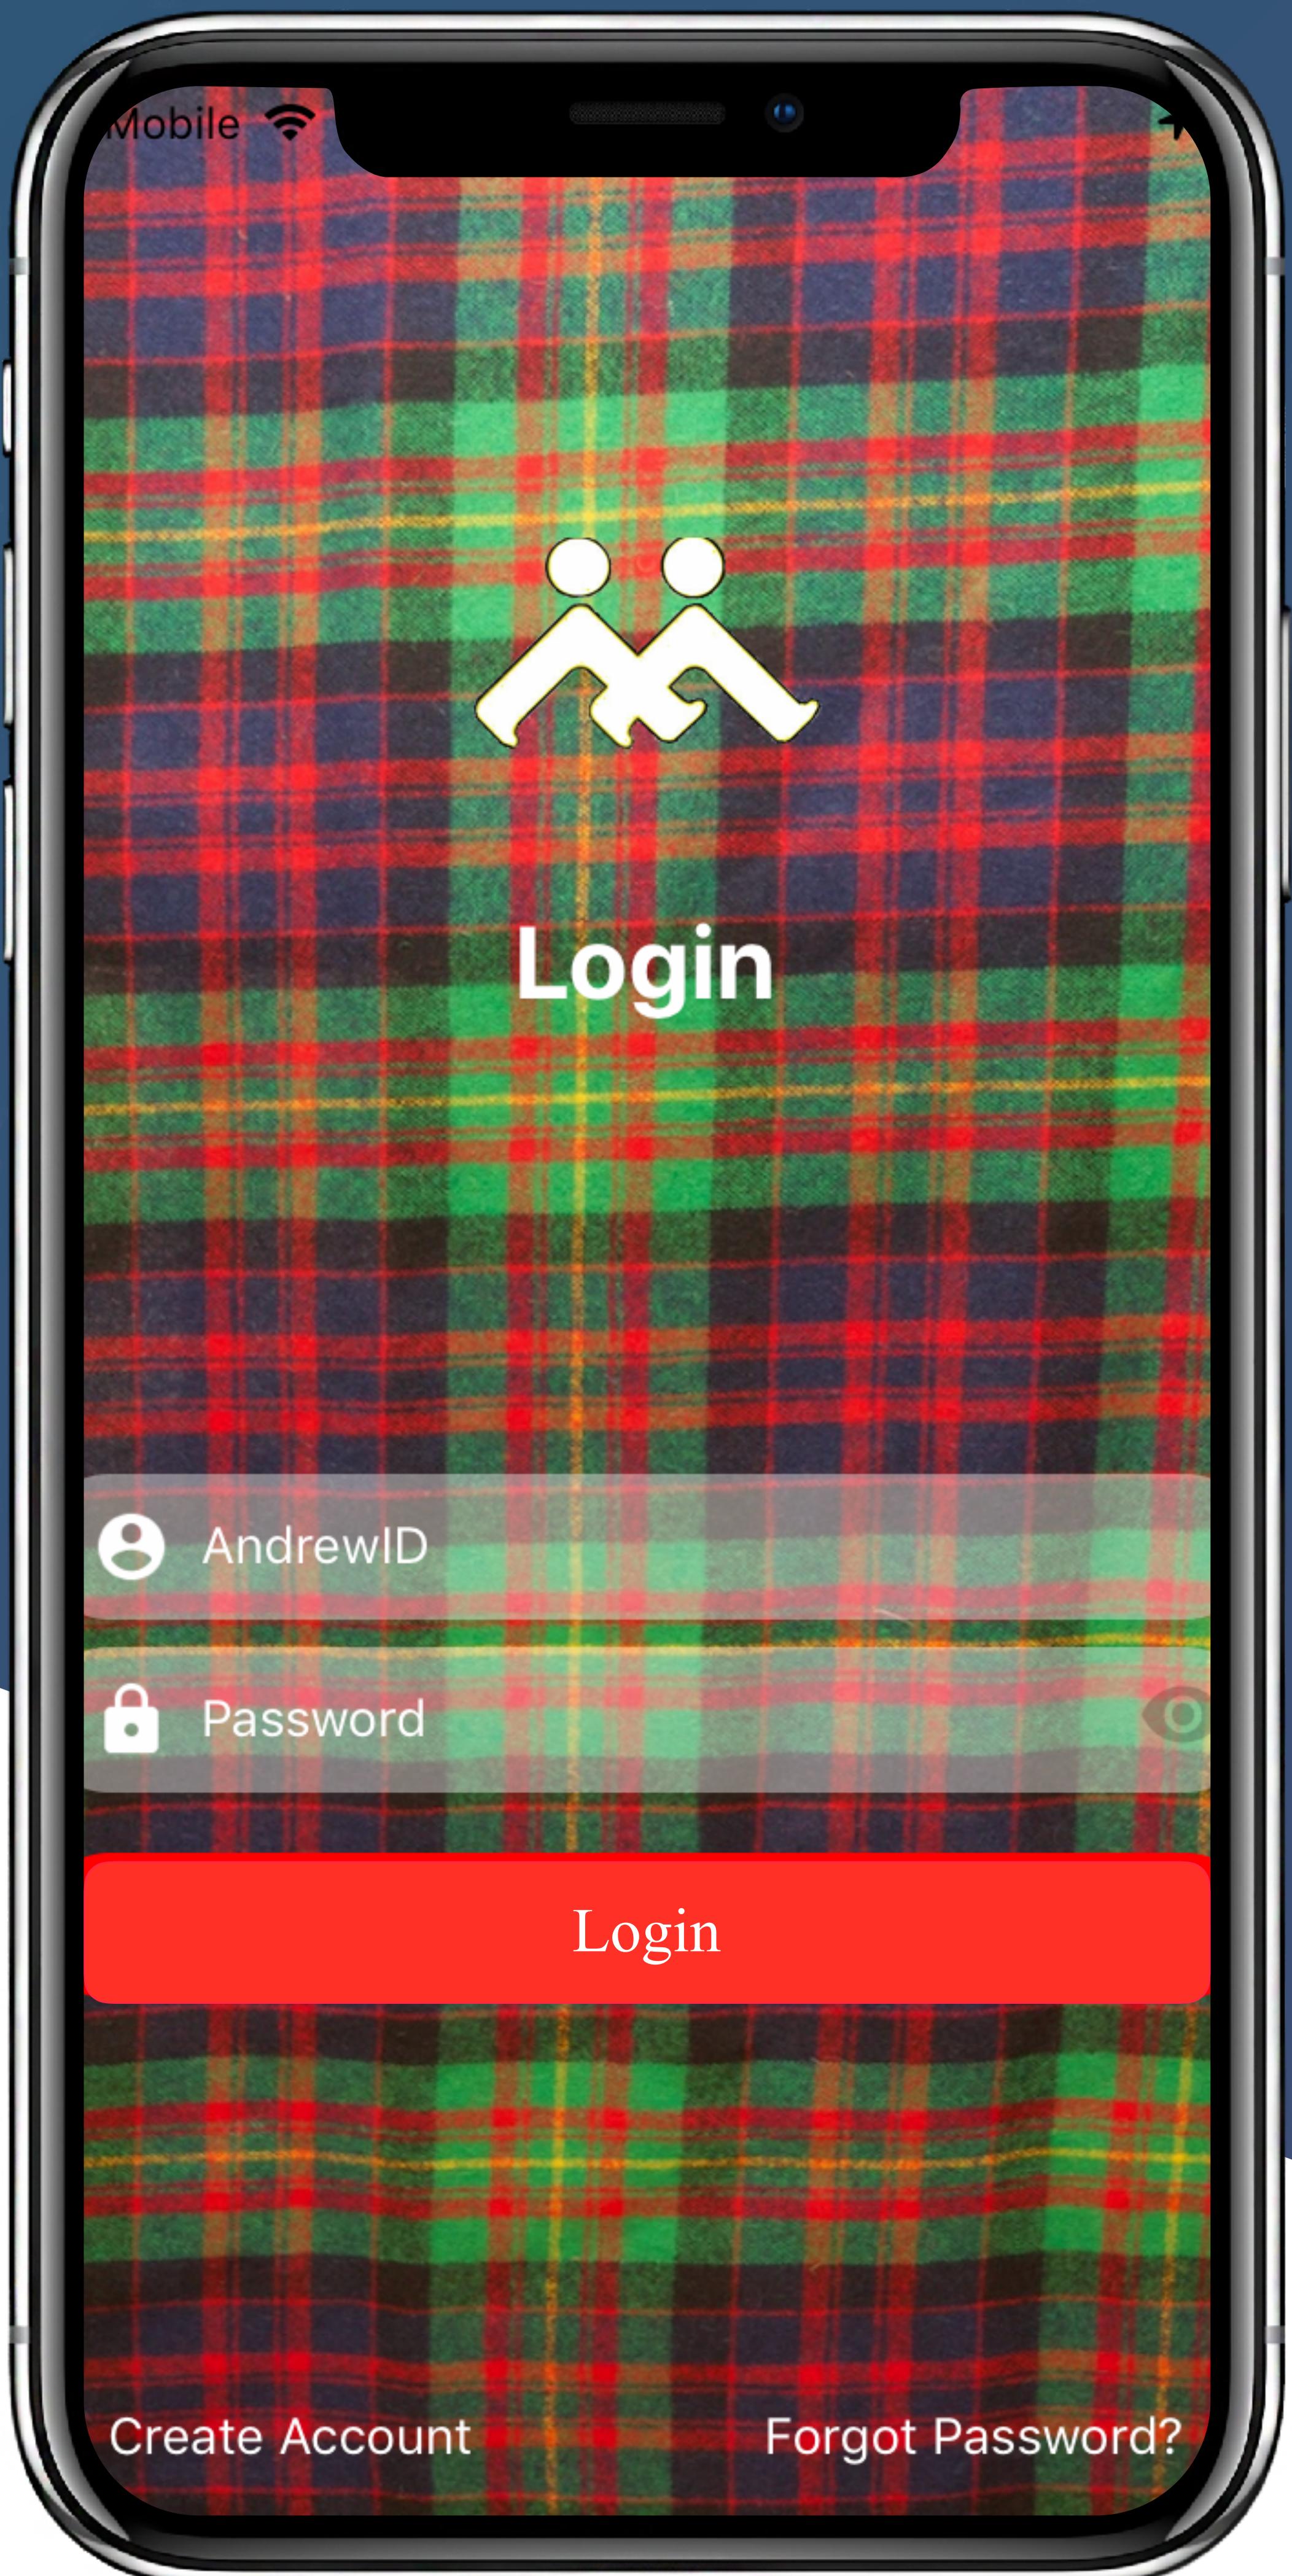

02

Walk buddies going in the  
same direction as you are  
prioritized

03

You can either choose  
someone going in same  
direction or near your  
destination
